

## **Internal Vacancies**

**We are seeking exceptional individuals to fulfil the following roles:**

### **Site Supervisors**

#### **Vacancies in all Regions**

You will be the formal day to day contact with the customer's representative either whilst on site or undertaking workshop based projects. You will be responsible for the induction, supervision and care of all permanent staff and casual workers under your control.

Excellent interpersonal, communication and time management skills are needed for this role, together with the relevant qualifications. Previous experience in the disaster recovery industry and IT literacy (Microsoft) are essential.

We provide a 24 hour service. Therefore a flexible approach is required as some unsociable hours and participation in a call out rota will be necessary. There is also a requirement to work away from home and at weekends as the workload dictates.

The role also requires the individual to work and/or supervise within the workshop when workload dictates. This will be on an ad-hoc basis.

A full driving licence is required. An excellent package will be provided to the successful candidates.
